

## **Yumiko Shaw – Resource Review**

**Title:** Power Up Blended Learning; A Professional Learning Infrastructure to Support Sustainable Change

**Author:** Catlin R Tucker

**Publisher of resource:** CORWIN

The recent rapidly changing society with new technology necessitates significant adjustments in our teaching practice more than ever. Blended learning is the pedagogical and technological inspiration, and my role as an NT DoE Teaching and Learning Officer is to ensure teachers feel inspired and supported as they transform their teaching practice toward blended learning. One great thing about this book is providing me with plenty of resources and strategies to support teachers through professional learning and to build an effective professional learning community for the future of Language education in NT. 4.5 Star (I cannot give 5 out 5 because I haven't read this book yet!)
